

Database Connection

DatabaseConnection.java

```
package dao;
import java.sql.Connection;
import java.sql.DriverManager;
import java.sql.SQLException;

public class DatabaseConnection{
    private static Connection connection;

    private static final String URL = "jdbc:mysql://127.0.0.1:3306/sisdb";
    private static final String USER = "root";
    private static final String PASSWORD = "root";

    static {
        try {
            connection = DriverManager.getConnection(URL, USER, PASSWORD);
            System.out.println("☑ Connection Successful!");
        } catch (SQLException e) {
            throw new RuntimeException("✗ Database Connection Failed!", e);
        }
    }

    public static Connection getConnection() {
        return connection;
    }
}
```

DatabaseTest.java

```
package main;
import dao.DatabaseConnection;
import java.sql.Connection;
import java.sql.SQLException;

public class DatabaseTest {
    public static void main(String[] args) {
        try (Connection conn = DatabaseConnection.getConnection()) {
            if (conn != null) {
                System.out.println("☑ Connection Successful!");
            }
        }
        catch (SQLException e) {
            e.printStackTrace();
        }
    }
}
```

```
}  
}
```

Main.java

```
DatabaseConnection.getConnection();
```

<terminated> DatabaseTest (1) [Java Application] C:\Users\WELCOME\.p2\pool\plugins\org.eclipse.justj.openjdk.
☑ Connection Successful!
